### EXECUTIVE SUMMARY

Web-based languages and technologies are the most used and desired.

JavaScript stands out as the most popular programming language due to its versatility and widespread use in web development. HTML/CSS, as the foundational technologies for building and styling web pages, play a crucial role in front-end development.

Python: the fastest-growing major programming language.

Python has risen in the ranks of programming languages in our survey, edging out Java this year.

The trend of cloud development is evidently shifting towards.

Linux is once again the most loved platform for development, with both Docker and Kubernetes also highly loved this year. Many developers say they want to start developing using Docker and AWS.

# INTRODUCTION

## Problems Defining

In the constantly evolving IT industry  
IT trends matter the most.

01

02

## Solid Background

Stack Overflow's annual Developer  
Survey is the largest and most  
comprehensive survey of people who  
code around the world.

03

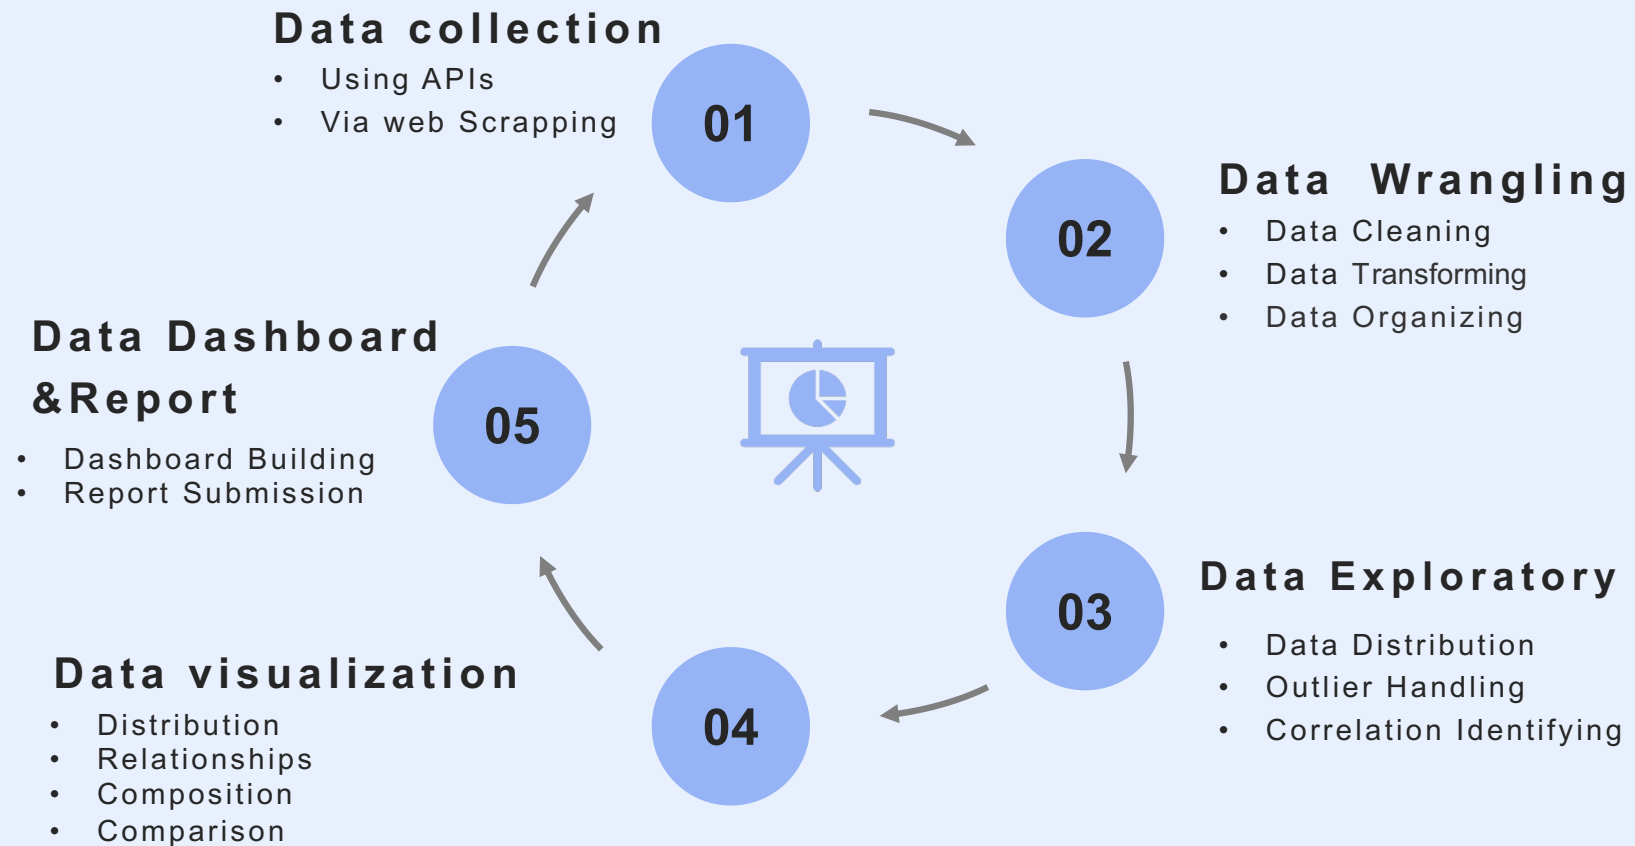

## The Goal

What are the technological needs  
of the world and the demands of  
the developers?

## METHODOLOGY

## RESULTS-Language Trend

### Currently

- JavaScript seems to keep as leading language.
- Python fastest-growing.
- Great interest in TypeScript

### Next Year

- PHP, Java, and C# are seen as outdated and require more effort, leading to their decline in usage.
- Go & Kotlin: Easier Alternatives to C

## RESULTS-Database Trend

### Currently

- MySQL: The most popular database.
- Microsoft SQL Server & SQLite: Declining interest.
- PostgreSQL & MongoDB: Gaining popularity.

### Next Year

- Microsoft SQL Server & SQLite: Losing market share.
- PostgreSQL & MongoDB: Gaining market foothold.

Edit profile

AlicelnBRisbane / README.md

👋 Hi, I'm @AlicelnBRisbane

---

📌 About Me

I'm a Marketing Analyst with a strong interest in data science, analytics, and full-stack programming. I enjoy exploring trends, uncovering insights, and building end-to-end solutions that bring data and functionality together seamlessly.

---

🌱 Currently Learning

- **Data Science & Analytics:** Sharpening my skills in data visualization and predictive analytics.
- **Full-Stack Development:** Building projects using **React**, **Node.js**, **JavaScript**, and **PHP**.

---

💖 Collaboration Interests

I'm excited to collaborate on:

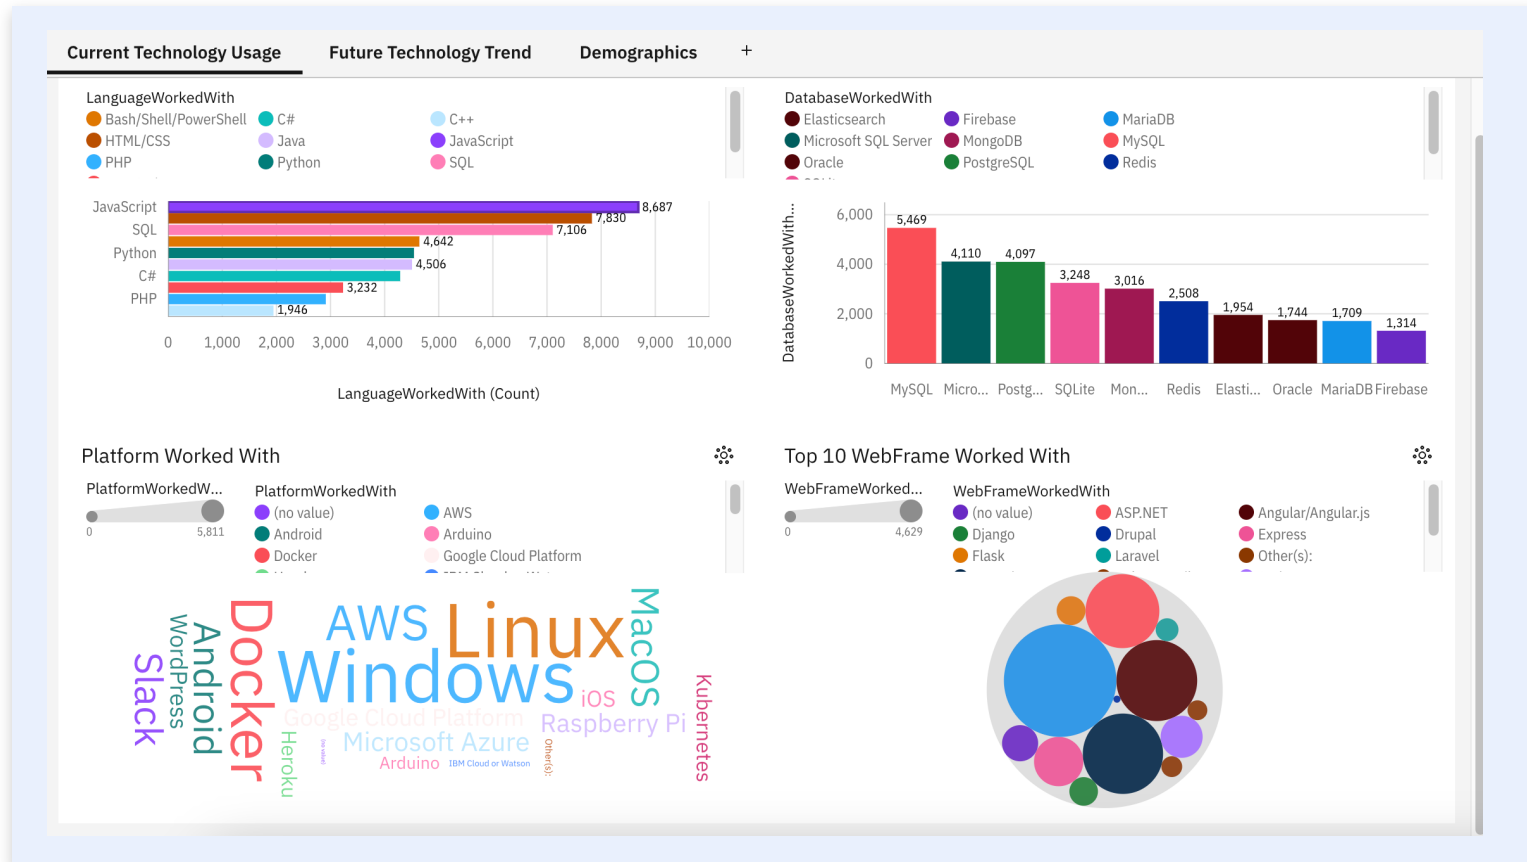

- Data visualization and analysis projects
- Full-stack applications for analytics and marketing tools
- Open-source projects in React, Node.js, or PHP

## DASHBOARD FUTURE TECHNOLOGY USAGE

# DASHBOARD DEMOGRAPHICS

## DISCUSSION

### FINDINGS

- Majority male, aged 22-32, from developed English-speaking nations.
- Key job factor: Languages & technologies.
- JavaScript widespread, TypeScript rising.
- Python: High salaries, abundant jobs, driving desire.

### IMPLICATIONS

#### Young Developers' Preferences

- Tendency for new tech: Youth Developers show desire for new languages and technologies.
- Job choice influence: Developers choose jobs based on tech, influencing employer choices.

#### Tech Trends and Demographics

- JavaScript & TypeScript rise: Gaining popularity among developers.
- Global polarization: Noticeable differences in developer location and gender.
- Education level: Majority of young developers lack postgraduate studies.

## CONCLUSION

### FINDINGS

- Developers have distinct characteristics that set them apart.
- By examining popularity trends of various tools, platforms, and languages, one can gain insight into what is currently in demand.
- Additionally, there is a need to improve accessibility to this job market for individuals in developing countries.
